

KalliopeCTI mobile

Stay connected! For those who always need to be on-call, Kalliope has designed the KCTI mobile app for Android™ and iOS®. You can choose how to manage your calls: via the GSM™ network or in Softphone mode based on data traffic availability. No longer risk being unreachable!

The **KalliopeCTI mobile app** allows you **access telephone and UC services from outside your office your office** through your extension number and company lines. You can, for example, access your company contacts, voicemail, presence info, and much more, all from your smartphone.

You can find the complete list of KalliopeCTI mobile features on our website, www.kalliope.com.

To guarantee stability and conversation quality, KalliopeCTI mobile offers you three different methods of making calls:

- **Click-to-call:** handle the call through the desk phone associated with your extension;
- **Call-back:** call from your smartphone using Kalliope lines;
- **Softphone:** use the smartphone as if it were your extension.

Kalliope in your pocket!

available on*

* Product available only if associated with a KalliopePBX® V4 VoIP PBX - Minimum Firmware version for GSM™ mode: 4.7.12. - A KCTI Pro license is required for the use of GSM™ mode only. For the use of both modes, GSM™ and Softphone, a KCTI Phone license is required. - Minimum version required for the operating system: iOS® 10 and Android™ Marshmallow. - Logos and trademarks mentioned in this publication are the property of their respective owners

Softphone

KalliopeCTI mobile lets the smartphone register directly on KalliopePBX® as any IP client by integrating a SIP telephony engine.

Softphone mode offers:

- an integrated SIP client;
- integrated native libraries (CallKit on iOS® and ConnectionService on Android™) to guarantee that the softphone is always reachable
- even when the terminal is on standby;
- call notifications when the app is closed or in the background;
- native VoIP call management

Status & Chat

KalliopePBX® offers an advanced status system available on all desktop and mobile clients. The user's status will be visible to all extensions. You also have the option of a customized message to display alongside the status.

KalliopeCTI mobile also includes a handy **Instant Messaging** service that lets you easily chat with other Kalliope users.

Conversations are synchronized between the cellphone and PC application to maintain the chat history.
