

# KALLIOPEPBX V4

**Product line**

## PRODUCT LINE

Give VoIP to your business!

KalliopePBX is available in a full range of models: from the solution designed for small businesses (KalliopePBX Mini) to KalliopePBX Rackmount models (V4R and V4R+), high profile products designed for commercial enterprises and public administration. For a middle ground, we have KalliopePBX Lite, which combines the scalability and expandability of the Rackmount models with the low size and cost of the Mini version. KalliopePBX is also available as a Virtual Machine (VMWare and Xen). As with the hardware models, there is no limitation on the number of

extensions supported. KalliopeVM licenses are distributed based on the number of external lines required, starting from a minimum of 5.

### Upgrade Mini to Lite

KalliopePBX Mini and KalliopePBX Lite use the same hardware, and the limitations of the Mini version concern exclusively its firmware. Because of this, the user can remove these limitations, unlock the software, and upgrade KalliopePBX Mini to KalliopePBX Lite by purchasing a license key. All models have the same firmware and all the standard features.
